

on reducing common bacteria and fungi on **surfaces** in 24-hour testing.

Comparing The Effects of RCI Technology and Ozone Technology on reducing common bacteria and fungi on **surfaces*** in 24-hour testing.

Testing by Kansas State University. Field results may vary based on environmental conditions.

Summary of Test Results – Biological Reductions using RCI (Ozone at .02 ppm):

- Staphylococcus aureus : **98.5% reduction**
- MRSA - Staphylococcus aureus (Methicillin Resistant): **99.8% reduction**
- Escherichia coli : **98.1% reduction**
- Bacillus spp. : **99.38% reduction**
- Streptococcus spp. : **96.4% reduction**
- Pseudomonas aeruginosa : **99.0% reduction**
- Listeria monocytogenes : **99.75% reduction**
- Candida albicans : **99.92% reduction**
- Stachybotrys chartarum : **99.93% reduction**

EcoQuest™, Healthy Living Technologies™, RCI Radiant Catalytic Ionizer™, are Trademarked by EcoQuest™ International. EcoQuest International "Healthy Living Technologies"®, is Registered by EcoQuest™ International. *Scientific tests have demonstrated the use of EcoQuest air purifiers substantially reduce microbial populations on **surfaces** – including but not limited to Escherichia coli, Listeria monocytogenes, Streptococcus spp., Pseudomonas aeruginosa, Bacillus spp., Staphylococcus aureus, Candida albicans, and S. chartarum. Presently EcoQuest does not make a similar claim with respect to airborne microbials. These statements have not been evaluated by the FDA. These products are not intended to diagnose, treat, cure, or prevent any disease.
